

GREATER MLS

A service of the Greater Metropolitan Association of REALTORS®

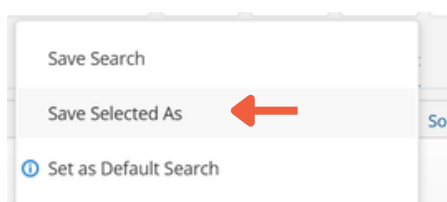

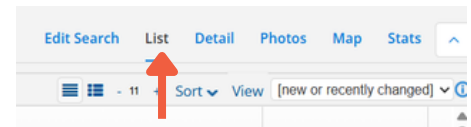

GreaterMLS Driving Directions

Did you know that you can streamline your showings by mapping out the listings and opening them in Google Maps to access quick and easy driving directions. This feature is one of the easiest ways to plan an efficient driving route for a day of showings.

Start by running your Search: In this example we are searching for Residential, Single Family properties in Ann Arbor under 600k with 4 or more bedrooms. Once you run the search you can view your results in any view that prefer. For this example will click on the List View.

From the list view you will select the properties that you want to include by putting a check mark on in the box on each property.

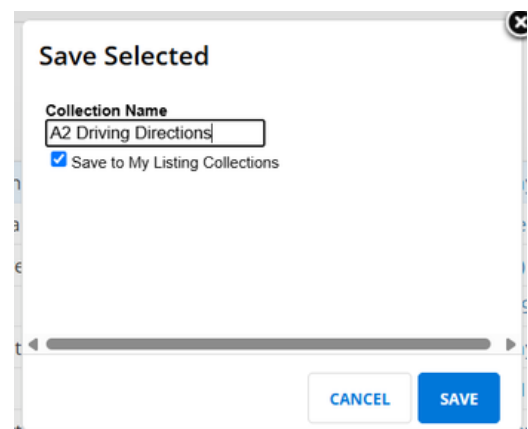

Select the properties you'd like to show.

Click "SAVE" and then "SAVE SEARCH AS"

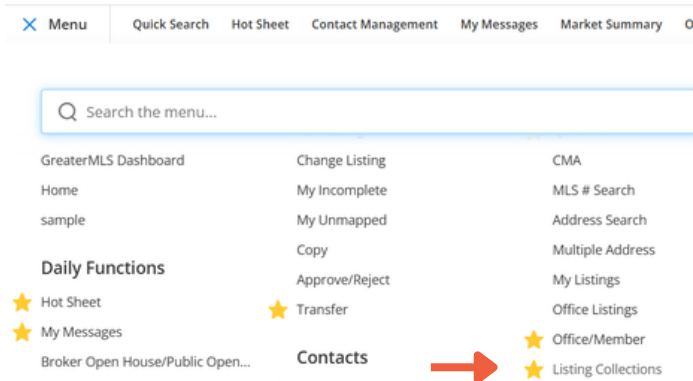

This will open the Save Selected window. This will allow you to save the properties into a Listing Collection. You will need to name the Listing Collection and make sure that "Save to My Listing Collections" has a check mark in the box.

Then hit SAVE in the bottom right corner.

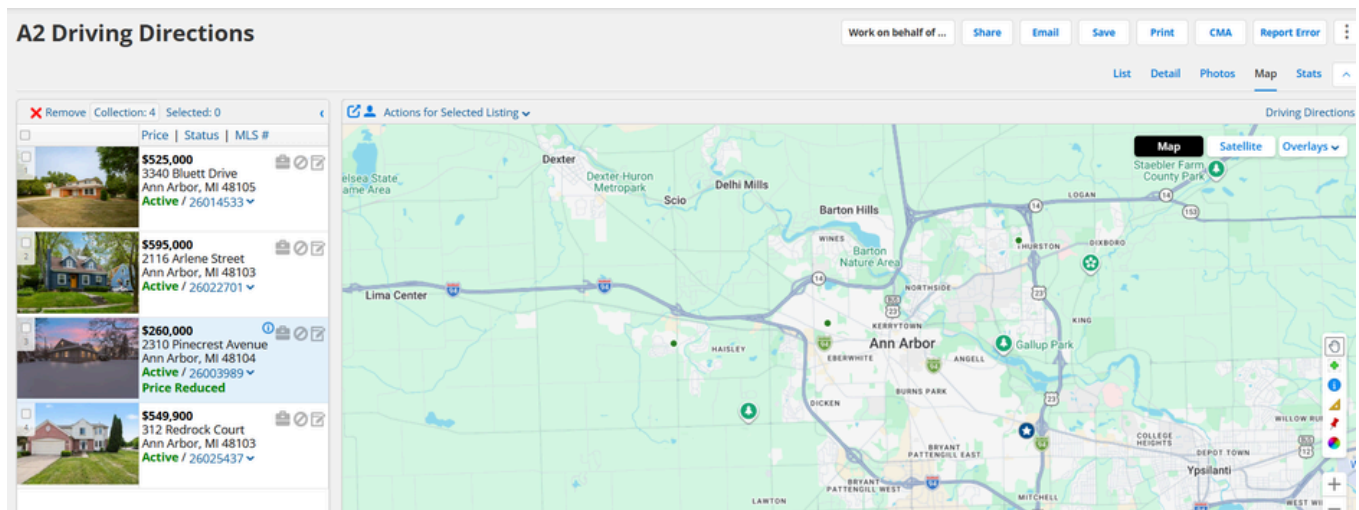

Once you save the Listing Collection, you will click on Menu and Listing Collections.

This will open up the Listing Collections Page.

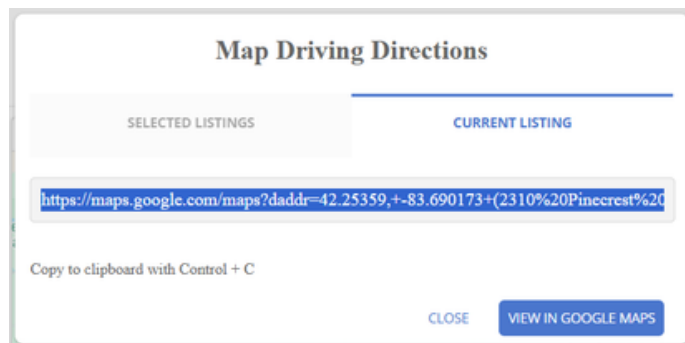

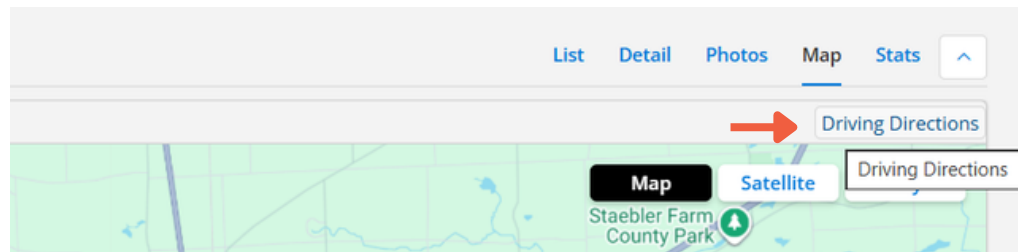

Select the Listing Collection

You will see the listings that you selected are included. If you toggle over to the map view. You can see where each property is located, indicated by the blue star on the map. You can drag and drop the listings into any order that you prefer.

Once you have the order set, you will click on Driving Directions in the top right corner above the map.

This will bring up the Map Driving Directions. You will have the option to copy the link or open in Google Maps.

It will open to Google Maps, with the properties that you selected in the order that you arranged them in, with the driving directions.

Be certain to select the properties, or select all, before requesting Driving Directions.
